

Canada West Drafting is a Calgary based design and drafting company. Our team adhere to quality in design and drafting standards. We are well rounded when it comes to the variety, type and scale of the projects. We have worked on SAGD projects, Gas plants, Oil batteries, Skidded Packages and all kinds of equipment's.

We closely cooperate with shops and vendors and we know what it takes to finish a project. From PFDs and P&IDs to detailed Steel, General Arrangement drawings and Isometrics, we will provide all the drawings required to make construction smooth and within deadline.

ENGINEERING

DESIGN AND

DRAFTING

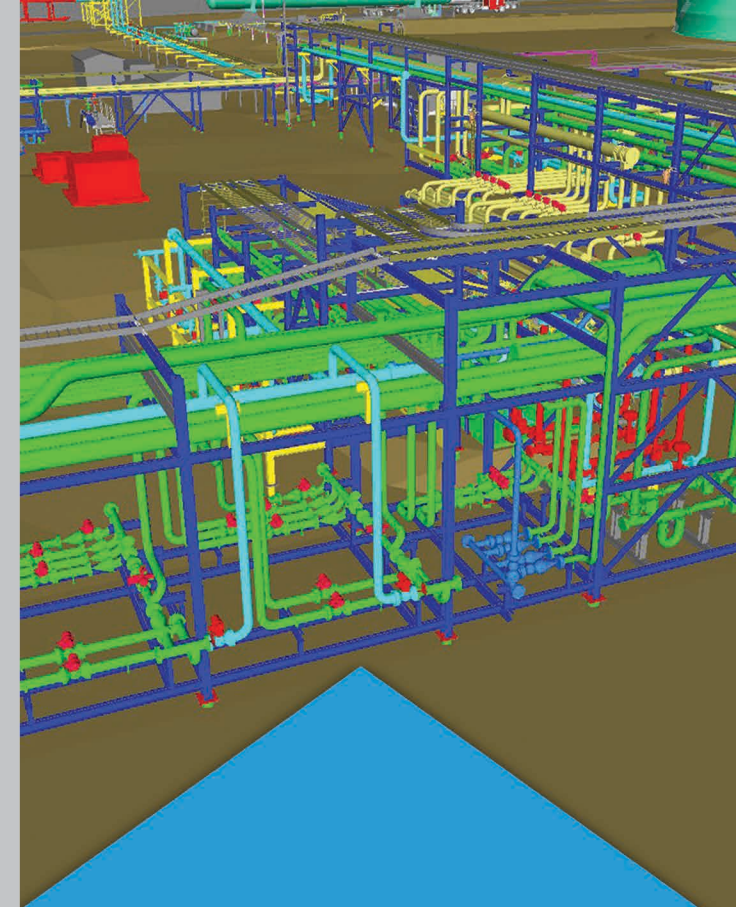

3D scanning is now an integrated part of our work. We have a variety of 3D scanners that covers most cases, from LIDAR to hand held, we have it all. Now we can provide our clients with an accurate As-built that will enable them to modify their existing facility on time and on budget.

1. Faro Focus MS 120 is a LIDAR scanner. It captures data as far as 120 meter away. It is accurate to  $\pm 2\text{mm}$ .

2. Eyesmap by Ecapture is a portable and very accurate 3D laser scanner. It is an excellent choice for doing skids and perfect for confined areas and hard to reach places.

3. Faro FreeStyle X is an extremely accurate mobile 3D scanner. This new model is accurate to 1 mm at 1 m distance, it works in low light and in hard to reach places.

Today's economy introduced a high demand for efficiency, cost control and quality assurance. Our primary focus is to provide a quality drawing packages delivered on time and budget. We work closely with our clients to meet their needs by providing everything from P&ID, Isometrics to 3D models.
